

# BUSLINE

## FIXED ROUTE TRAVELER INFORMATION

BusLine automates transit call centers by providing public transit riders with automated next bus, schedule, service changes/disruptions, bulletins and other valuable transit information.

### BENEFITS

#### Cost Savings

Increase center capacity without adding staff. Agents can focus on complex inquiries. BusLine reduces the overall cost per call.

#### Better Customer Service

Riders have convenient 24/7 access to transit information. Busy signals and hold times are reduced or eliminated.

#### Easy to Install and Maintain

BusLine integrates seamlessly with your scheduling and operating environment. BusLine also integrates with HandyLine.

#### Scalable

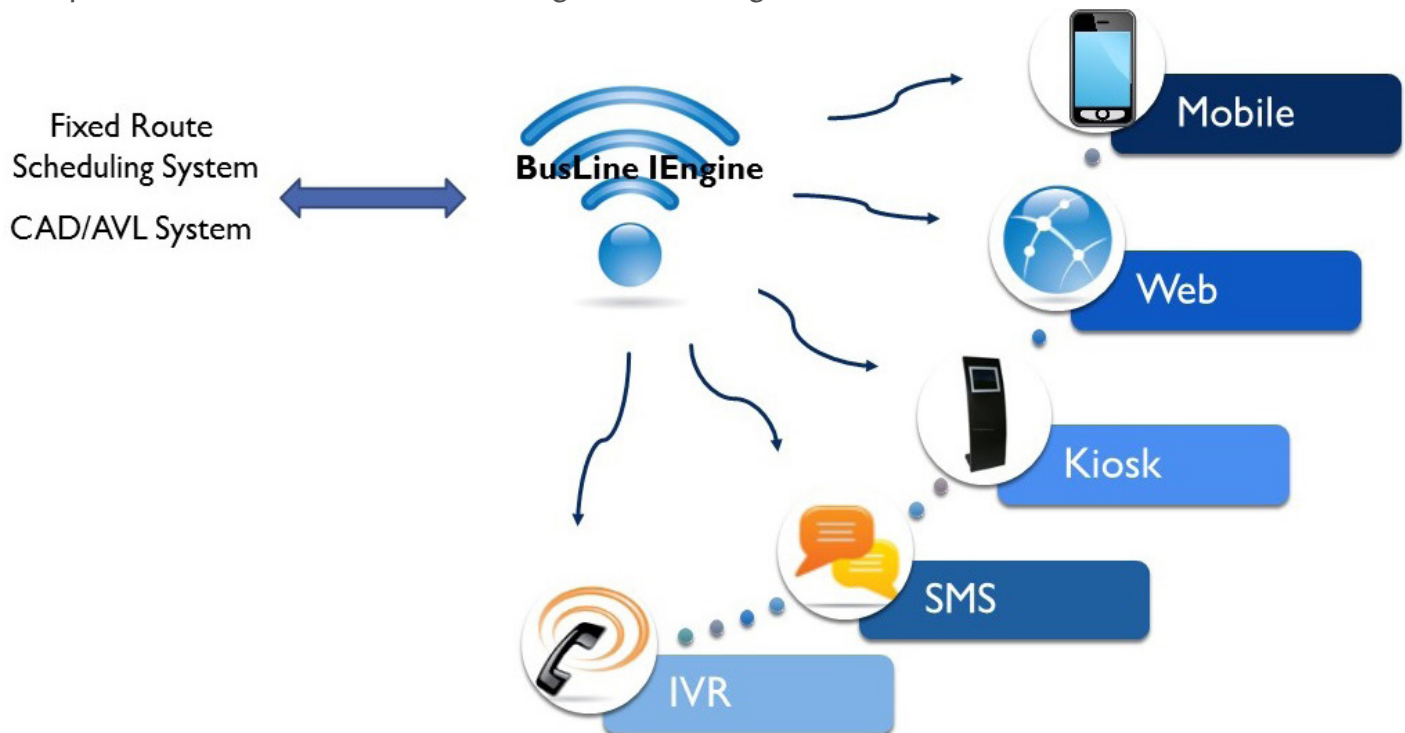

BusLine can scale to handle any call volume.

#### Configurable

Change bulletins, surveys, or agent settings at any time.

#### Flexible

Add optional features such as SMS or AVL integration for even greater customer satisfaction.

# BUSLINE

## FIXED ROUTE TRAVELER INFORMATION

### STANDARD FEATURES

#### Next Bus Times

Riders select a timing point or numbered stop, and BusLine returns the next times a bus will pass the location.

#### Schedule Lookup

Riders select a route, day and time and BusLine provides schedules at timing points for that route.

#### Bulletins

Announce special events, emergency information, delays, and detours to riders. Bulletins can be generic or specific to the route, date or time.

#### Surveys

Configure surveys to poll your riders on any subject and receive detailed feedback on the results.

#### System Reports

View or print detailed BusLine usage statistics.

#### Control Center

Use our sophisticated Control Center administrative tool to configure BusLine without any system downtime.

### OPTIONAL FEATURES

#### Stop Level Information

BusLine provides schedules and next bus times for each individual stop.

#### SMS Integration

Riders can request and receive stop information by text message.

#### AVL Integration

When BusLine is integrated with your Automatic Vehicle Location (AVL) system, riders receive real-time schedule and next bus times, adjusted for delays.

#### Computer Technology Integration (CTI)

Provides call center agents with the collected call detail allowing the customer's query to be handled more efficiently.

#### Pass and Ticket Sales

Riders can place orders for tickets without speaking to an agent. Reports are generated for order fulfillment.

### ABOUT ENGHOUSE TRANSPORTATION

With over 30 years experience, Enghouse Transportation is committed to developing and delivering solutions for public and private transportation industries through innovative computerized applications and consulting support.
